FIRE FIGHTING MEASURES

Fire hazard classification (OSHA/NFPA):	1
Extinguishing media:	As required for fire being fought.
Special fire fighting procedures:	Use self-contained breathing apparatus.
Hazardous combustion products:	None known.

SECTION 6**ACCIDENTAL RELEASE MEASURES****Personal precautions, protective equipment and emergency procedures:**

Wear protective clothing as described in Section 8 of this Safety Data Sheet.

Containment procedures:

Stop the flow of material, if this is without risk.

Wear appropriate protective equipment and clothing during clean up.

Clean up procedures:

Do not allow the spilled product to enter public drainage system or open water sources.

Sweep up or gather material and place in appropriate container for disposal.

Empty product containers may contain product residue, do not reuse.

SECTION 8**EXPOSURE CONTROLS/PERSONAL PROTECTION****Ventilation system:**

Always keep exposure below permissible exposure limits.

In general, dilution ventilation is a satisfactory health control for this substance. However, if conditions of use create discomfort to the worker, a local exhaust system should be considered.

Airborne exposure limits:

None established.

Personal protection:

As prescribed in the OSHA Standard for Personal Protective Equipment (29 CFR 1920.132), employees must perform a Hazard Assessment of all workplaces to determine the need for, and selection of, proper protective equipment for each task performed.

Eyes:

Wear face shield, safety glasses or chemical goggles.

Hands and skin:

For prolonged or repeated handling, use impervious gloves. Gloves should be tested to determine suitability for prolonged contact. Use of impervious apron and boots are recommended.

Respiratory:

If ventilation is not sufficient, appropriate NIOSH/MSHA respiratory protection must be provided.
