

Model 201C SPRAY GUN

ADVANCED
CHEMICAL
TECHNOLOGIES, Inc.
"Protecting the World's Infrastructure"

The model 201C Hand Gun allows for quick and easy application of Multigard™ to all vertical and horizontal concrete surfaces. No more mixing to much or too little chemical solution because the 201C Hand Gun dispenses directly from the Back Pack (not pictured); mixing the Multigard™ at desired dilution rate. Dilution rates are controlled by color coded metering tips.

It is the perfect sprayer for covering vertical areas and hard-to-reach places and it connects to any available water supply.

FEATURES

1. Comes with it's own carry case as pictured.
2. Pressure regulator for accurate control.
3. Easily assembled and dismantled for storage.
4. Color code metering tips for accurate dilution control.
5. Quick connection for backpack. (not pictured)
