

Model 204C SPRAY BAR

ADVANCED
CHEMICAL
TECHNOLOGIES, Inc.

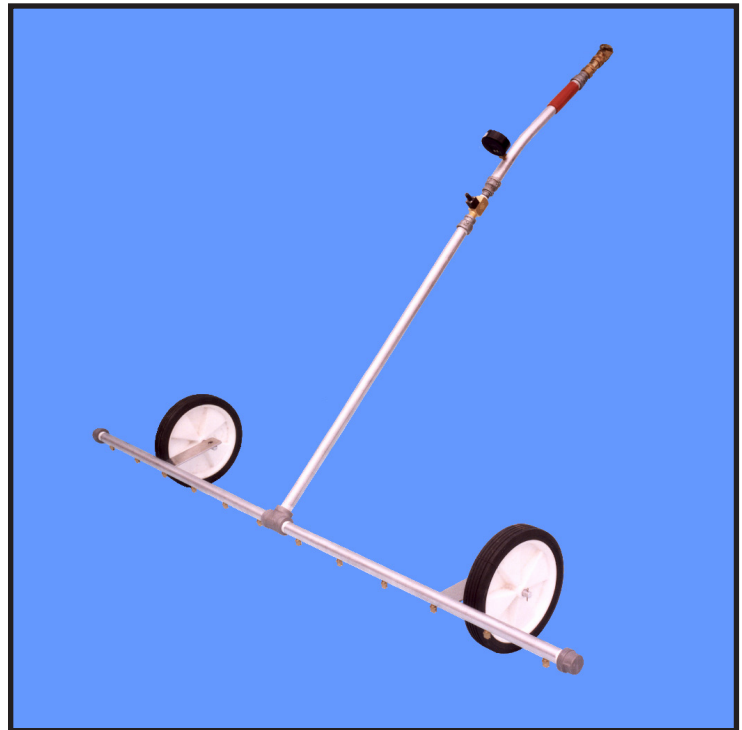

"Protecting the World's Infrastructure"

The model 204C Spray Bar allows for quick and easy application of Multigard™ to parking lots, garages and all types of concrete surfaces. No more mixing to much or too little chemical solution because the 204C Spray Bar dispenses directly from the Back Pack and precisely mixes the Multigard™ at desired dilution rate. Dilution rates are controlled by color coded metering tips.

Simply attach the 204C Spray Bar to a water supply and fill the Back Pack (not pictured) with Multigard™. Attach the vinyl hose between the Spray Bar and the Back Pack and you are ready to cover large areas quickly and easily.

FEATURES

1. All aluminium construction.
2. Pressure gauge.
3. Pressure regulator for accurate control.
4. Comes with own plastic carry case. (not pictured)
5. Easily assembled and dismantled for storage.
